Master of Applied Mechanics specialized in Material Processes and Technology of Composites
Vignan university, India

1. Could you describe in a few words your Master's studies at Centrale Nantes and its strengths? And why you chose Centrale Nantes?

I am a master student in Applied Mechanics with a specialization in Material Processes and Technology of Composites. Centrale Nantes is dedicated to its students and is a very good platform for people with interest in research and development. Not only that, the courses here are well planned to get the students an experience of industry and research. Only students of Centrale Nantes can plan their career with high confidence.

2. What about the campus life at Centrale Nantes?

The campus life at Centrale Nantes is lively. No time here passes without interesting events. Centrale Nantes encourages its students to socialize and show their other cultural skills. Centrale Nantes gives importance also to international cultures and does its best for cultural exchange.

3. What was your internship about? Was it linked to your career plan?

My internship was to study the flow behavior of some fluids in certain media. It was interesting as this study is a new industrial requirement and it was very exciting to work on something that can be used to improvise the present technologies. I did my internship in the GeM laboratory in Centrale Nantes which has the best equipment. My supervisors were very encouraging and it was an honor working for them. My internship was fully related to my career plans. And the courses

taught at Centrale Nantes were sufficient to approach every step of the work.

4. Would you recommend Centrale Nantes?

I would definitely recommend Centrale Nantes. The experiences that this university has given me are precious. Centrale Nantes has some of the best professors in the world who are very dedicated to their students. The administration is always ready to help. Centrale Nantes has been my best choice.

5. Other comments? Feel free to add any comments, drawings or anything you want

Being a student of Centrale Nantes gave me something more than just education. And that is a taste of French culture. Be it dancing for a French audience and being appreciated, or tasting the strongest cheese or be it the love of travelling. It was all worth it. I also got to know that a baguette goes pretty well with Indian curry!
