Centrale Nantes: “SME cybersecurity advisor” – a new certified training programme

Three months after the General Data Protection Regulations came into force, Centrale Nantes’s “SME cybersecurity advisor” training programme was certified by SecNumEDU of the ANSSI (the French national authority in cyberdefence and network and information security) as an executive education programme in digital security.

Open to company employees, SME executives and managers, this new 28-hour training programme will commence in November allowing participants to acquire various skills:

- Analyse the needs and propose solutions in response to information security issues within the structure.
- Manage cybersecurity in small and medium-sized businesses and implement the security procedures inherent to functional needs.
- Conduct information security projects by respecting and enforcing information security obligations and responsibilities.
- Advise and make recommendations to the company's stakeholders with regard to the technical and legal practices to adopt.
- Protect and maintain the security of information systems using means and resources that can be mobilized internally and externally.

Developed based on an analysis of training needs in the digital sector in the Pays de la Loire region, Centrale Nantes' executive education aims to help companies broaden the skills of their current workforce and to find new recruits with the right skills set.

About Centrale Nantes

Founded in 1919, Centrale Nantes is a French engineering school and member of the Ecoles Centrale Group. Its undergraduate, Master and PhD programmes are based on the latest scientific and technological developments and the best management practices. At Centrale Nantes, research and training are organised into three key areas for growth and innovation: manufacturing, energy transition and healthcare. With research platforms ranging from digital simulation to prototyping using full-scale models and an incubator with 20 years of experience in supporting start-up projects, the school has two major tools for innovation and creation, working hand in hand with industry. Centrale Nantes promotes its teaching and research capabilities at international level through around 100 partnerships with prestigious universities and schools worldwide.

Centrale Nantes welcomes 2,410 students, including 1,440 undergraduate students, 170 Executive Education and ITII degree apprenticeship students, 270 PhD students, 430 Masters students, and 100 Bachelor/Foundation Master students on its 40-acre campus.
